EDUCATION

Drexel University (Pennoni Honors College)

Philadelphia, PA

Bachelor of Science in Custom-Designed Major, Focus: Human-Centered Artificial Intelligence

GPA: 3.70

Expected Graduation: June 2029

Honors & Awards: Dean's List (Fall 2024 - Present), Aspire Scholars Program

Student Organizations: Hack4Impact, Drexel AI

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, Racket, C, JavaScript

Libraries & Tools: AIOHTTP, AsyncIO, Numpy, Pandas, Figma

Developer Tools: Git, VS Code, PyCharm, Anaconda, Vim, Power BI

AI & ML Tools: LangChain, FAISS, OpenAI API

Relevant Coursework: AI, Cognition, & Society; Math Foundations of Computer Science; Advanced Programming Tools and Techniques; Linear Algebra; Multivariate Calculus; Intro to Human-Computer Interaction; Ethics; Storytelling for UX

EXPERIENCE

Drexel University Public Safety

Mar 2026 - Present

Data Analysis & GIS Co-op

- Developed asynchronous Python data pipeline using AIOHTTP and AsyncIO to extract and merge CAD and case incident data from Drexel Public Safety's internal REST API, pulling 7000+ records per month in <90 seconds
- Designed an interactive Power BI dashboard utilizing the pipeline's output, visualizing 600+ incidents across 2025 by temporal patterns, call volume, and incident categories to support public safety reporting

Center for Science, Technology & Society

Jan 2026 - Mar 2026

Independent Researcher - AI, Cognition & Society

- Synthesized 15+ generative AI sources on algorithmic bias, predictive policing, and LLM effects on critical thinking, producing weekly citation-based reading responses
- Produced 2 research reports on algorithmic bias and enterprise AI ROI failures for faculty evaluation

TechTogether - Freelance

Oct 2023 - Jun 2024

Co-Founder, Educator

- Pitched partnership with Oakmont Senior Living to launch digital literacy workshop program for 20+ seniors
- Designed an 8-session curriculum covering topics such as social media, photo sharing, and texting vocabulary
- Achieved 90% participant satisfaction rate through iterative curriculum improvements based on session feedback

PROJECTS

LLM Red Team Tool | Python, OpenAI API, Streamlit, SQLite

Apr 2026 - May 2026

- Sourced 100 real-world toxic prompts from LMSYS Toxic-Chat dataset via HuggingFace to benchmark GPT-4o and GPT-4o-mini safety behavior across hate speech, manipulation, and jailbreak categories
- Built adversarial testing pipeline across 5 conditions; prompt engineering alone drove refusal rates from 31% to 76%
- Developed regex + LLM classifier that flagged soft refusals in 16-25% of responses missed by pattern matching alone

Multi-PDF Q&A Chatbot | Python, LangChain, OpenAI API, FAISS, Streamlit

Dec 2025 - Jan 2026

- Developed document Q&A pipeline with Streamlit dashboard using LangChain and OpenAI API to answer questions over uploaded PDFs
- Implemented RAG using FAISS vector search, achieving 89-95% faithfulness on a 10-question RAGAS evaluation
